CONTENTS

1 INTRODUCTION

1.1 Early Lifecycle Software Design 1

1.2 Computational Intelligence 5

1.3 Research Contributions 7

2 BACKGROUND

2.1 Software Design

2.1.1 The Design Process 10

2.1.2 Conventional Tool Support 19

2.2 Computational Intelligence Complementary to Early Lifecycle Design 24

2.3 Search Based Software Engineering 35

3 PROPOSED EVOLUTIONARY SEARCH

3.1 Representation 42

3.2 Quantitative Fitness Functions 52

3.3 Selection 54

3.4 Crossover 55

3.5 Mutation 57

3.6 Conclusions 58

4 METHODOLOGY

4.1 Research Aims – Revisited 59

4.2 Organization of Investigation 59

4.3 Strategy 60

4.3.1 Local Search 62

4.3.2 Global Search 63

4.3.3 Empirical Investigation 64

4.3.4 Qualitative Elegance 66

4.4 Example Software Design Problem Specifications 68

4.4.1 Cinema Booking System 68

4.4.2 Graduate Development Program 69

4.4.3 Select Cruises 71

5 EXPERIMENT: LOCAL SEARCH

5.1 Background 74

5.2 Methodology 76

5.3 Results 77
5.4 Analysis 81
5.5 Dynamic Parameter Control 83
5.6 Methodology 87
5.7 Results 89
5.8 Analysis 98
5.9 Conclusions 102
6 EXPERIMENT: GLOBAL SEARCH
6.1 Background 104
6.2 Methodology 105
6.3 Results 107
6.4 Analysis 108
6.5 Zone Isolator Agent 110
6.6 Methodology 111
6.7 Findings and Analysis 112
6.8 Conclusions 116
7 EXPERIMENT: EMPIRICAL INVESTIGATION
7.1 Background 118
7.2 Software Design Problem Domain 120
7.3 Method and Empirical Investigation Design 121
7.4 Observation and Data Collection 123
7.5 Results 125
7.5.1 Duration 125
7.5.2 Software Designs Produced 125
7.5.3 Event Log 125
7.5.4 Comparison of Design Episodes 127
7.5.5 Human Experience 131
7.6 Analysis 131
7.7 Threats to Validity 133
7.8 Conclusions 133
8 EXPERIMENT: QUALITATIVE EVALUATION
8.1 Background 135
8.2 Proposed Approach 137
8.2.1 Quantitative Elegance Measures 137

8.2.2 Role of Quantitative Elegance Measures 139
8.2.3 Elegance Agent and Dynamic Multi-objective Search 140
8.2.4 Dynamic Fitness Proportionate Interactive Interval 143
8.2.5 Overview of Proposed Approach 144
8.3 Methodology 145
8.4 Results 148
8.4.1 Baseline Elegance Investigations 148
8.4.2 Designer Interaction and the Dynamic Interactive Interval 155
8.4.3 External Coupling 159
8.4.4 Reward 161
8.4.5 Elegance and Dynamic Multi-objective Search 166
8.4.6 Human Experience 171
8.5 Conclusions 173
9 CONCLUSIONS
9.1 Representation 177
9.2 Exploration and Exploitation of Software Design Search Space 178
9.3 Collaborative Designer / Computer Interaction 178
9.4 Elegance and Dynamic Multi-objective Localised Search 179
9.5 Overall 181
