The Found World: a learning adventure at Eden

Katie Collins, Hugo Gaggiotti, Svetlana Cicmil, Sandra Laurent (UWE, Bristol academics)
&
UWE MBA & MSc SDiP Students:
Akinloluwa Akinbusoye, Jody Lockyer, Abimbola Bakare, Christen Seanna, Ayman Bakhache, Onyekachukwu Eyisi, Sam Aldridge, Caleb Sizemore, Belén Martinez, Vivien Akubuilo

Learning from the sharp end – implications for sustainability in Higher Education
6-9 September 2015 Bristol, UK
The Eden Project field trip as a ‘living educational laboratory’

Complex and contested topics: Sustainability, ecological crisis, SD, project success

Participatory pedagogy: students “as full equal partners and co-researchers” (Fals-Borda, 1995, p. 1; also P Freire and L Evans)

To explore and experiment together (students, lecturers and hosts) with:
- ecological ethics and humane understanding of limits/green citizenship
- biological, cultural and linguistic diversity
- complexity, apprehension/anxiety

Creating space for radical and critical dialogue between:
- Moral, spiritual and political perspectives
- Pragmatic engagement with technological and behavioural solutions

An emergent process of conscientisation (Freire, 1970): knowing and learning for action
The process of collective visioning

• Making sense of the experience as a collective story

• Collective field notes of lived experience

• Post trip reflections prompted by four questions

• Open coding

• Meet to reflect on emerging themes

• Collaborative writing, enabling dissenting voices
Embodied reactions

- Openness, optimism
- Out of everyday concerns
- Serenity, tranquillity, sensing
- Stress reduction, mindfulness
- Frustration, lack of voice
- Restlessness, distraction, wanting to get on
- Enjoying spending time with others
- Joy of nature Inspirational
Critical thinking

- Cultural specificity
- Is it sustainable? How defined?
- Synergies between topics: not one issue
- Impact on local area / people / equality?
- What about people & behaviour?
- Is Eden authentic?
- Corporate partnerships
Impact on self

- Changed research interests
- Reinforcing / introducing global mind set
- Potential for ‘true’ social enterprise
- ‘Personal social responsibility’ career
- Aware of trade-offs, pragmatic decisions; corporate partnerships
- Power of narrative

Conscientization/Critical Consciousness

Learning for action as an adventure, a participatory, “reflective process that brings to consciousness knowledge one may have acted on but not fully realized or elaborated, making possible future, purposeful action” (Lyons, 2002, p. 96)

- it is relational and so is practical action

- it is ‘painful’, a bodily felt sense of anxiety, ‘letting go’ of assumptions to face the emergence of new possibilities and unpredictability

- inseparable from epistemological anxiety – multiple truths

- involves situational ethics
Conscientization/Critical Consciousness (eco-virtue ethics)

Compassion, solidarity, multi-centrism, value-based learning, teaching by example, and ‘cunning wisdom’ (‘combining toughness and tenderness’ Curry, 2011, p181, passion and principle) are needed for practical action amid tensions:

- the cross-cultural language of sustainability
- 'New environmentalism' Ideology?
- Community development
- Corporate collaboration
- the corrupting influence of money on the democratic process and public policy
- Pragmatic optimism: A mystical formula of commercial and social enterprise
Our students are both impressed and sceptical, cutting through the rhetoric of sustainability to conclude that at core, the Eden brand is “selling us a connection to nature”. But they are impressed by Eden’s successful dialogue with big corporations like McDonalds and BP, believing that such pragmatism is imperative if we are to realise a sustainable future.
